Weimar Germany:

The statistics in Germany only accounted for professed Jews and not Jews by race so they were far underrepresented

out of ten Jews, seven live in large cities and three in small towns or in the country, while, for the rest of the population the proportion is exactly the reverse, in so far as in their case seven live in the country and only three in large cities

the Board of Directors of the Berlin Stock Exchange consisted exclusively of Jews

Jews represented 25/40 of the economic division

22 50% of law and health were run by Jews

"Institute for Sexual Science" was to degrade the family

Jewish groups were created with the slogan "soldiers are murderers"

All the newspapers wrote good reviews about Communist and Bolshevist. A Soviet film was treated as the best film ever produced

Jews would speculate army contracts they had offered for war material; this is how Germany lost WWI and could not control the Weimar Republic

Jews had sabotaged WWI. For example, they sent chocolate to a manufacturer of goods

42 Prosecutors couldn't put Jews in jail for bribery under the claim for anti-Semitism

Every position of authority was occupied by Jews in the October Revolution

Jews were behind making Germany look like the perpetrators of WWI

Communist assassins were seen as victims in court

Students were subjected to visiting brothels and had to write about it

39% of Berlin was Jews while they had only made up 1% of Germany

Each Jew had four and a half times as much as the regular German

60% of Berlin belonged to the Jews

To solve the Jewish Problem, Jews were prohibited from buying gold and silver, Jews had to surrender all stocks. Also, Jews could not own a firearm

Jews could take out an unlimited amount of money to immigrate to Palestine

Hitler personally reviewed the Haavara agreement twice and approved of it. Because of WWII, they had to put the Jews in camps. For two years Jews hid their role in it.

74 Germans were willing to help out to get the Jews to win in Palestine

Jews fill 25% of Harvard when their merit doesn't deserve it

Dow Jones and Wall Street owned by Jews

Jews were behind bait and switch (loans that cannot be paid back) in 2006

Concentration camps:

at least 20 million died from 1917 to 1937 at Gulags

they went so far as to lie that Stalin appointed the 11 out of 12 commanders at the Gulag to blame the Jews

children had to report their own parents

Roosevelt had a pastor who published a book, and 26 other anti-communist spies arrested for treason against the U.S. government

People only got a small piece of bread during the summer and often collapsed in cold during the winter. They were beaten until they couldn't lift an arm

Jews kept the food so scarce, so a counter revolution was impossible in the Gulags. The death toll was large amongst children.

Soviets had lied about children being put in comfortable "homes" schools. Homeless children were brought to concentration camps. Children would die on the freight trains over to the camps.

28 The local work department officers would mock homeless children looking for work in the labor force and would send them to a Gulag. They were treated as state criminals and were either shot or "sent off"

letters that were sent from the Gulags had to be short and could not explain

The guards were all verbally abusive. The slightest negligence or inability to work would lead someone to the "penal isolator" where they were sent on starvation rations and tortured in every way possible.

Tradesmen and peasants had to go to the Gulags. They would succumb in masses from the work due to being unable to work a manual job, their bodies were too taxed with the work.
